Professional Summary:

Business Intelligence Analyst with 5+ years of experience delivering data-driven insights across Microsoft supply chain and engineering teams. Skilled in SQL, Power BI, KQL, and Excel to build dashboards, automate reporting, and improve business visibility and KPI tracking. Experienced in translating business requirements into analytical solutions, developing data models and visualizations, and supporting data-driven decision-making. Certified Scrum Master with strong experience in Agile collaboration, stakeholder management, and cross-functional analytics projects.

Tools: **SQL | Power BI | KQL | Excel | Tableau | Azure | Cosmos DB**

Technical Skills:

- **Data Analysis & BI Tools:** Power BI (DAX, Data Modeling, Incremental Refresh), Tableau, Excel (Power Query, Pivot Tables)
- **Databases & Query Languages:** SQL, KQL (Kusto Query Language), Cosmos DB
- **Cloud & Data Platforms:** Microsoft Azure, SQL Server
- **Analytics Techniques:** Data Modeling, KPI Development, Root Cause Analysis, Segmentation Analysis, Predictive Modeling
- **Project & Collaboration Tools:** Agile/Scrum, Jira, Stakeholder Management, KPI Reporting, Process Improvement

Professional Experience:

Program Analyst | Virginia Mason Franciscan Health (College-Internship) | Jun 2024-Jun 2025

- Built Power BI dashboards to analyze supply and implant cost trends and track operational KPIs.
- Performed data cleaning, EDA, and segmentation analysis to identify supply chain cost drivers.
- Conducted root cause analysis and supported predictive modeling for cost forecasting. Collaborated with cross-functional teams to deliver data-driven insights for supply chain optimization.

Program Analyst | Microsoft (TekSystems) | Sep 2021 – June 2022

- Analyzed supplier performance, procurement metrics, and inventory trends using SQL, Excel, and Power BI.
- Built Power BI dashboards to track supplier KPIs, lead times, and order fulfillment performance.
- Supported Supplier Relationship Management (SRM) by monitoring vendor performance, cost variances, and delivery metrics.
- Performed data analysis and reporting to improve supply chain visibility and operational decision-making.
- Collaborated with cross-functional teams to resolve data quality issues and enhance reporting accuracy.

Data Analyst | Microsoft (Quadrant Resource) | Feb 2019 - Sep 2020

- Queried large-scale telemetry datasets using Kusto Query Language (KQL) to monitor system performance and operational health.
- Integrated Cosmos DB JSON data into Power BI analytics pipelines for reporting and operational dashboards.
- Automated reporting workflows, reducing report generation time by 40%.

Data Analyst | Microsoft (Pactera) | Jan 2018 – Feb 2019

- Built Power BI dashboards to track store sales performance and revenue KPIs.
- Analyzed sales and customer segment data to identify revenue trends.
- Performed SQL-based data extraction and analysis for operational reporting.
- Automated reporting workflows, reducing manual effort by 30%.

Education:

Six Sigma Yellow Belt (SSYB), 6Sigma Study (Feb 2026)

Certified Scrum Master (CSM), Scrum Alliance (Sep 2025)

MS – Business Analytics University of Washington, Tacoma | (June 2025)

Master's in Computer Applications Nagpur University, India | (2009)

Bachelor of Science Nagpur University, India | (2006)
